

**VESCOM** + **SILVER**

# Revolutionary

The renowned quality of Vescom.

Now available with breakthrough, antimicrobial Silvadur™ technology—destroying germs and odors at the point of contact. Environmentally responsible, exceptionally effective and virtually invisible.

A Vescom Exclusive

## Versatile

**Vescom + Silver.** Added to any of Vescom's extensive line of wallcoverings as a cost-effective upgrade, the design possibilities are virtually endless. Any time you specify any of Vescom's products, for any location or purpose, you can now add Silvadur's antimicrobial, germ-fighting properties.

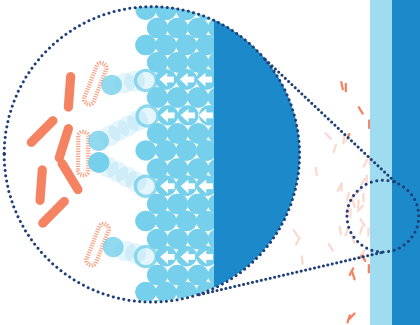

## Effective

**Vescom + Silver** is unlike any other antimicrobial product. This patented, breakthrough technology offers a long-lasting, natural way to destroy pathogenic microorganisms. An ideal solution for environments that require clean environments, such as hospitals, hotels, senior care facilities, restaurants and retail, providing cleaner environments.

Wallcovering

**SILVADUR** surface coating is effective against a broad range of bacteria and microorganisms

Silvadur's self-replenishing properties maintain constant equalized protection

Protection at the surface to destroy bacteria, mold and mildew, even through repeated cleanings

## Durable

**Vescom + Silver** utilizes the power of Silvadur at the surface, enabling its controlled-release, germ-destroying properties to work where bacteria and odors contact. The self-replenishing properties of the Silvadur coating continuously replenish affected areas—even after repeated cleaning—retaining antimicrobial protection for the life of the product.

Green

**Silver** is known worldwide as a safe, natural antimicrobial. And Silvadur's patented breakthrough technology now gives Vescom customers an environmentally friendly way to destroy bacteria, odors, mold and mildew.
